Mixers

With over 100 years of experience, Milton Roy Mixing is a global leader in mixing and agitator equipment. We ensure quality and reliability through every stage in the process: from selection, design and planning to testing, installation and maintenance. Our highly trained, experienced global team is ready to take on your mixing challenge.

Compact Vertical Mixers Helisem® Series

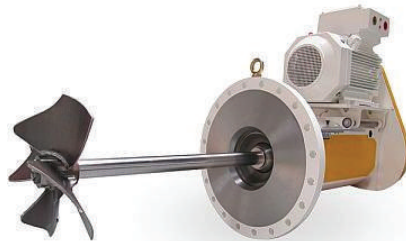

The HELISEM® Range offers 5 distinct series – VDA, VRP, VRH, VRG, and FRH – each with a specific impeller, to support a wide range of open tank applications from 2.5 to 520,000 gallons (10 L to 1,970 m³) and viscosities up to 1,000 mPas (cP) at 1.3 specific gravity.

MIXERS RANGE

HM OPEN TOP MIXERS

Power: 0.37 to 37kW

SIDE ENTRY MIXERS

Power: 7.5 to 55 kW

HEAVY-DUTY MIXERS

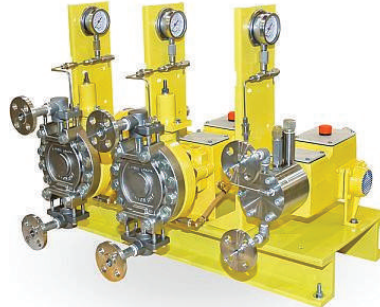

Power: 0.55 to 500 kW

METERING PUMPS

MACROY® SERIES

Pressures up to 175 psi

MILROYAL® SERIES

Pressures range from 100 psi

M-ROY SERIES

Pressures range from 100 psi

PROTEUS® SERIES

53 GPH Capacity

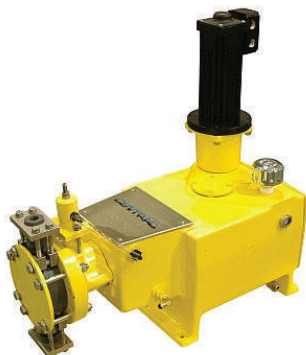

PRIMERoy® SERIES

Available in different models

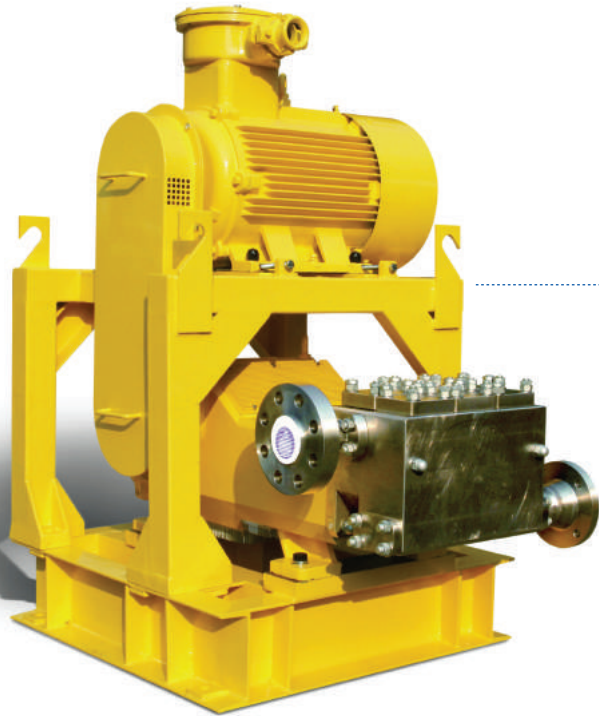

Industries

- Chemical / Petrochemical
- Food and Beverage
- Oil and Gas
- Refinery / Downstream
- Water / Wastewater Treatment

Accurate Metering Pump CENTRAC™ Series

- Capacity range between 0.45 gph minimum to 550 gph maximum
- Discharge pressures up to 9,000 psi
- Maximum stroking speed at 162 spm
- $\pm 0.5\%$ steady state accuracy over 100:1 turndown ratio
- Simplex or duplex configurations

Reciprocating Process Pump POWEROYAL Series

Optimize efficiency, minimize maintenance and improve performance in high-pressure, high-volume applications

The Poweroyal® positive-displacement reciprocating pump provides outstanding performance in demanding conditions. Ideal for high-pressure/high-volume applications, the pump has been designed for maximum performance in minimal space.

Industries: Oil & Gas, and Chemical and Petrochemical Processing

High-Volume, High Pressure Process Pump Megaroyal® Series

Optimal leak-proof performance for high-volume chemical injection

Designed for your most critical industrial processing needs, the Megaroyal process pump provides reliable, leak-proof performance with a modular design in a minimal footprint.

Industries: Oil & Gas, and Chemical and Petrochemical Processing

OUR CHEMICALS RANGE

kenlen Group is supplier of Water Treatment Solutions from reputable Global suppliers.

RO MEMBRANES
Water Treatment

REAGENTS CHEMICALS
Water Treatment

HTH CHLORINATORS
Water Treatment

COAGULANTS
Water Treatment

About Kennlen Group's Water Solutions

Our comprehensive selection of metering pumps and systems can inject chemicals such as coagulants, disinfectants, softening agents, acids and bases for pH control, de-chlorination chemicals, and many more. Design features such as durable construction means it can withstand varying fluid, temperature, and environmental conditions while capacity adjustment enables accurate output flow control. Our pumps are well-known for their reliability. With preventative maintenance, these metering pumps perform at peak levels, leading to less shutdowns and long-term cost benefits.

Mixers can provide effective agitation for sludge digestion and aeration during industrial wastewater treatment. Our mixing technology has been designed for low-energy usage, reduced chemical-additive consumption and ease of maintenance. With standard or custom designs and a global network of expertise, we can deliver a solution for maximum uptime.

Kenlen Group Africa in Botswana operates different subsidiaries supplying mining equipment to the market for more than 10 years. The company is based in Gaborone at Gaborone International Commerce Park with operations in all major mining towns across Botswana and Zimbabwe.
